**NOTIFICATION OF NON-COMPLIANCE WITH THE REQUIREMENTS
OF 37 § CFR 41.37**

1. Upon review of the IFW, it is noted that "*Summary of claimed subject matter*" appearing in the Appeal Brief filed 10/02/2007 is deficient.

2. 37 CFR § 41.37(c) (1) (v) reads as follows:

(c) (1) The brief shall contain the following items under appropriate headings and in the order indicated in paragraphs (c)(1)(i) through (c)(1)(x) of this section, except that a brief filed by an appellant who is not represented by a registered practitioner need only substantially comply with paragraphs (c)(1)(i) through (c)(1)(iv) and (c)(1)(vii) through (c)(1)(x) of this section:

....

(v) *Summary of claimed subject matter.* A concise explanation of the subject matter defined in each of the independent claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters. For each independent claim involved in the appeal and for each dependent claim argued separately under the provisions of paragraph (c)(1)(vii) of this section, every means plus function and step plus function as permitted by 35 U.S.C. 112, sixth paragraph, must be identified and the structure, material, or acts described in the

specification as corresponding to each claimed function must be set forth with reference to the specification by page and line number, and to the drawing, if any, by reference characters.

The “*Summary of claimed subject matter*” appearing in the Appeal Brief filed 10/02/2007 is deficient because it fails to provide a proper mapping the claimed invention to the claims.

For Example, Appellant maps the claim limitation “*converting at least a portion of a secure audiovisual object into index information, wherein the index information is structured for use in an index database of a search engine system, and wherein the secure audiovisual object is secure, in that search engine systems do not have full access to the secure audiovisual object*” to Specification, page 18, lines 26- 28.

Page 18, lines 26-28 read “*At the state 512, the server computer 110 converts all or selected portions of the source data object that is associated with the request into machine readable characters, that will collectively comprise an initial set of index information for source data object*”.

Also, Appellant maps the claim limitation “*transmitting the obfuscated index information to the search engine system, wherein the obfuscated index information is for use in the index database of the search engine system*” to Specification, page 11, lines 29-31.

Page 11, lines 29-31 read *“resource that is associated a selected URL, the server computer 110 transmits an electronic document having index or other descriptive information regarding the source data object that is associated with the request, or, alternatively, one of the source data”*.

The above cited portions, however, fail to suggest the claimed *“converting at least a portion of a secure audiovisual object into index information, wherein the index information is structured for use in an index database of a search engine system, and wherein the secure audiovisual object is secure, in that search engine systems do not have full access to the secure audiovisual object”* and *“transmitting the obfuscated index information to the search engine system, wherein the obfuscated index information is for use in the index database of the search engine system”*.

Appellant is advised to review the *“Summary of claimed subject matter”* and provide a proper mapping for the subject matter defined in each of the independent claims involved in the appeal.

3. A substitute brief that is in compliance with 37 CFR § 41.37(c) is required. To avoid dismissal of the appeal, Appellant must comply with the provisions of 37 CFR 41.37(c)

within ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing of this communication. Extensions of time may be granted under 37 CFR 1.136.
